

Amendments to the Specification:

Please replace the paragraph beginning at page 3, line 10 with the following amended paragraph:

It is known that a functioning immune system contributes to overall good health, including healthy skin. Researchers at Shiseido and Harvard Medical School and Massachusetts General Hospital, see, for example, ~~the Shiseido website at "www.shiseido.co.jp"~~, have hypothesized that use of make-up promotes a positive state of mind which in turn promotes beautiful skin through stimulation of the nervous system and internal secretions. Conversely they hypothesize that skin condition can deteriorate because of stress.
